#### Description

---

This ticket is used for delivery of **NordDRG 2024** national definition tables (json, xlsx, csv).

The delivery of tables and feedback from national organisations follows the NordDRG timetable <https://www.nordcase.org/eng/principles/timetable/>

Feedback from national organisation to PL0 and PR0 tables is expected within 10 working days after delivery of respective tables.

While making the changes in NDMS and running the validations we noticed that changes of DGCATs of Finnish MDC19 diagnosis codes (see TCs on ticket #854) created a need for revision of the mapping of Finnish MDC19 dg codes and ICD+ codes.

Furthermore, the new mapping created a need to revise also other grouping features (COMPL, COMPLEX, PDGPROP, DGPROP, SDGPRO) of MDC19 dg codes. This was done based on the best knowledge by using 2023 version information. This means that some of national codes which previously had certain grouping features do not have them anymore in 2024 version and vice versa.

In addition, rule of DRG P01O *OR procedure due to gender-identity related contact, short therapy* was added to logic. The rule was missing in TCs. The rule of P01O is a copy of DRG P01 *OR procedure due to gender-identity related contact* rule and is placed above the rule of DRG 424O *O. r. procedure w principal diagnosis of mental illness, short therapy. Duration <3 days*.

We would like Finland to pay attention to PL0 version testing results and double-check the MDC19 dg codes grouping features in 2024PL0 def.table and suggest changes if need be *via* this ticket (we keep the ticket #854 closed).

##### #4465 - 2023-05-19 13:14 - Lotta Sokka

We have now tested FIN 2024 PL0 -version and found a couple of errors that need to be corrected:

1. For rule id 119D0099901 we want to add or\_proc P.
2. For dg code R448 we want to restore all the same properties the code had in 2023 version.

Based on the information from a software company concerning FIN2024PL1 tables, there was a need to correct Finnish tables (some of the MDC rows of F-diagnosis were missing in Diagnosis Feature table). The updated tables (FIN2024PL1a) are attached to this ticket.
