##### #4504 - 2023-09-08 14:58 - Lotta Sokka

- Attachment *FIN\_ATC\_ATC+\_codes.xlsx* added

Attached is the full list of 7-characters and 5-characters ATC codes (and respective ATC+ codes) in Finnish version. As agreed on ticket #853, the 5-characters ATC codes will be inactivated on 31-12-2023 and kept in definition tables until they expire (in five years).

ATC codes will be identical in Diagnosis and Procedure Feature table. The features of the ATC codes will remain in Finnish 2024PR version unchanged. If any changes needed, we will create a new case.

##### #4508 - 2023-09-20 09:20 - Kristiina Kahur

- Status changed from Active to Closed

#### Nordic Casemix Centre/Kristiina Kahur 20-09-2023

Thank you for updates. The changes have been made in NDMS/MBC. Please double-check the changes during the testing of 2024PR0 tables.

For time being, the ATC codes will be maintained among the diagnosis and procedure codes tables in MBC (i.e. the same way as it has been so far). We need additional time to change the maintenance process of ATC codes. Given that the priority is to respect the annual timetable and timely delivery of the 2024PR0 tables, we will focus on the change of the maintenance of ATC once the 2024PR tables are finalized.

Case is closed.

##### #5049 - 2025-06-04 16:13 - Kristiina Kahur

- Task type changed from Case to Primary classifications

- Target Group deleted (FIN)
