Feedback from the national organisation to PL0 and PR0 tables is expected within 10 working days after the delivery of the respective tables.

#### History

##### #4664 - 2024-05-03 09:59 - Lotta Sokka

We have tested PL0 and found some errors in the logic that needs to be corrected.

In PL0 logic hierarchy DRG 082C and DRG 082N are placed above DRG 082A and DRG 082B. That is incorrect. The correct order is:

082A Hengityselinten kasvaimet, sädehoito (*082FA Respiratory neoplasms, radiotherapy*)

082B Hengityselinten kasvaimet, sytostaattihoido (*082FB Respiratory neoplasms, cytostatic therapy*)

083C Hengityselinten kasvaimet, komplisoitunut (*082C Respiratory neoplasms w cc*)

083N Hengityselinten kasvaimet, ei komplisoitunut (*082N Respiratory neoplasms*)

Also, DRGs 239C and 239N are placed above DRGs 239A and 239B. The correct order is:

239A Tuki- ja liikuntaelinten tai sidekudoksen maligniteetti, sädehoito (*239A Pathological fractures & musculoskeletal & conn tiss malign, radiotherapy*)

239B Tuki- ja liikuntaelinten tai sidekudoksen maligniteetti, sytostaattihoido (*239B Musculoskeletal & conn tiss malign, cytostatic therapy*)

239C Tuki- ja liikuntaelinten tai sidekudoksen maligniteetti tai patologinen murtuma, komplisoitunut (*239C Pathological fractures & musculoskeletal & connective tissue malignancies, w CC*)

239N Tuki- ja liikuntaelinten tai sidekudoksen maligniteetti tai patologinen murtuma, ei komplisoitunut (*239N Pathological fractures & musculoskeletal & connective tissue malignancy, w/o CC*)

And finally, DRG 377N is placed above DRGs 384A and 384B, although it should be vice versa. The correct order is:

384A Raskauden aikainen tila, komplisoitunut (*384A Antepartum diagnoses, w CC*)

384B Raskauden aikainen tila, ei komplisoitunut (*384B Antepartum diagnoses, w/o CC*)

377N Obstetrinen toimenpide (*377N Obstetrical problem with other OR procedure*)

Will you please do the corrections needed and send us corrected tables for another round of testing.

P.S. You might want to recheck the Combined name for DRG 239C. The mapping seems to be correct, but the name doesn't seem to match the

2026-06-25

code.

The requested changes in the grouping logic have now been completed. We have also re-evaluated and unified the drg\_text\_com and drg\_text\_short\_com names of the DRGs 239x. PL0a tables for further testing are as annex.

**#4673 - 2024-05-10 12:37 - Lotta Sokka**

Finland has now tested PL0a version and the results are as expected, except for one thing: Due to inconsistency in costs, we wish to withdraw the cc / non-cc split for DRG 239E.

We want the group to remain as it was in 2024 version:

239E Tuki- ja liikuntaelinten tai sidekudoksen maligniteetti tai patologinen murtuma (Pathological fractures & musculoskeletal & connective tissue malignancy)

No more testing is needed to be done, so after the above-mentioned change, PL1 tables can be delivered.

We have now tested the PR0 version, and the results were as expected.

However, while testing, we noticed, that several ATC codes were missing from the dg code table, and they need to be added to it. These codes can be found in the attached Excel file (FIN\_additional\_ATC\_updates\_30.9.2024.xlsx).
