Description

This ticket is used for the delivery of the **NordDRG 2026** national definition tables (json, xlsx, csv).
The delivery of tables and the feedback from national organisations follow the NordDRG timetable https://www.nordcase.org/eng/principles/timetable/

Feedback from the national organisation to PL0 and PR0 tables is expected within 10 working days after the delivery of the respective tables.

The required changes concerning NDMS have now been done. They can be found in PL0a tables attached to this ticket.

As for your last question about the need of -99V23 for the logic rows ids 200D120160 and #00D001950 (L78O and L78R), we don't see the need for that. Firstly, if we use the rule for these two rows, it should be used for all the other rows concerning visits or primary care, not distant. Secondly, the cases should group as expected also without it.

Please do the necessary testing and let us know the results.

Hi,

Unfortunately we found some minor errors we want to update, se attached file.

#5033 - 2025-05-27 15:10 - Lotta Sokka

Thank you for these.

However, we don't quite understand one of the changes in the logic table (concerning DRG A22N), as the OUT and IN rows are identical (except for the ord).

We can see the question is propably about change in hierarchy. Our question is: where do you want to relocate this logic row (between which two existing rows)?

Hi,

Here is Mats Fernströms answer. I hope this answers your question:

Cases with insertion of nervous system central stimulation devices for pain problems (MDC 23) do not fit in DRG W09/461 (Operationer utförda i samband med andra kontakter med sjukvården/ OR procedures performed during other contacts with health services), neither descriptively nor economically. Therefore, the existing rule in drg_logic with ID 490D010000, leading to DRG A22N/570X (Implantation/byte av annan nervstimuleringsutrustning / Insertion or replacement of nervous system central stimulation device) must be placed above the rule with ID 423D0200001 leading to DRG W09A/461M.

For the same reason, the rule with ID 123D0001001 leading to DRG W09O/461O must be placed after the rule with ID 190D0099001 leading to DRG A20O/570O. (We chose to move the rule for DRG W09O/461O down instead of moving the rule for DRG A20O/570O up because it was easier.)

We added one more row in the TC (G38E), se attached file.

Thank you for the clarification. The latest requested changes have now been done and PL0b tables are attached to this ticket. Check carefully especially the location of the rule id 407D191000, that it is as you wanted it to be. Note that in NDMS the **ord** of the rule is created automatically.

Error correction

Hi,

We have found a discrepancy in the logic of DRG R65E and R97O. We have also received three late procedure codes that we would like to add.

Nordic Casemix Centre/Kristiina Kahur 16-10-2025

Thank you for updates concerning the new codes and discrepancy in logic table.

Three new proc codes have been added to MBC/NDMS.

Before making the changes in the logic table, please double-check the attached edited TCs to make sure the changes will be made as you suggested:

- Changes related to DRGs R65E and R97O concern the hierarchy of the rules. I tried to mark it clearly in TC which rows should be removed where.
- You do not mention DRG E35N *Övriga operationer på kärl* in text above but you have indicated in TC that row with id 405D130148 should be removed from the table. Is this the change you would like to do?

Please confirm the changes in the logic table before we make them in NDMS.

#5162 - 2025-10-20 10:04 - Asa Wresros

Hi,

- We want R97O above G97O and R65E above G38E in the logic table.
- Yes, we want to remove the row with id 405D130148.

Nordic Casemix Centre/Kristiina Kahur 20-10-2025

Thank you for clarifications. The changes were made in NDMS accordingly.

NordDRG SWE2026PR1 tables are now attached to this ticket. Please double-check and compare with your tables and let us know if any additional edits are needed or confirm that the tables are fine and we can close this ticket.

Hi,

SWE2026PR1 tables delivered by the NCC are ok and we can close the case.

According to code AW019 in proc_feat table we would like to change the plus code from WZZ999 to R1R100.

#5173 - 2025-11-11 15:28 - Kristiina Kahur

- Status changed from Active to Closed

Nordic Casemix Centre/Kristiina Kahur 11-11-2025

Thank you for confirmation. We will create a separate ticket for a remapping of code AW019 and close this case.
